

Position Available: .NET Systems Developer
Location: Appleton/Fox Valley and Milwaukee

Avastone Technologies, LLC creates custom software solutions for commercial, industrial, education and government customers throughout Wisconsin. Our software development team specializes in database and Internet application development. Due to our expanding business, we are seeking to add to our software development staff. We are specifically looking for a Systems Developer whose primary responsibilities include providing business solutions using VB.Net, C#, ADO, ADO.Net, Javascript, ASP, ASP.Net, PHP, SQL Server and SQL Server Reporting Services.

Interested candidates should have a Bachelor's degree in Computer Science, MIS, or related field, a minimum of 2 years .NET design and development experience including VB.NET, ASP.NET, 3-5 years SQL server experience, effort estimation experience and a high degree of organizational skills. Experience with SQL Server 2000/2005 and SQL Server Reporting Services is a plus. The ability to communicate clearly with our customers face to face and in writing is essential.

Submit cover letter and resume to:
