

Position Available: Business/Analyst Programmer
Location: Appleton/Fox Valley

Avastone Technologies, LLC creates custom software solutions for commercial, industrial, education and government customers throughout Wisconsin. Our software development team specializes in database and Internet application development. Due to our expanding business, we are seeking to add to our software development staff. We are specifically looking for an experienced Business Analyst/Programmer whose primary responsibilities include working with customers in order to understand their business needs, defining system requirements, developing and overall systems design/prototype and coordinating with other team members during the development, testing, and deployment of the software solution. Secondary responsibilities include assisting in the development process utilizing Visual Basic, ADO, SQL Server and/or web development utilizing Java Script, ASP, and HTML.

Interested candidates should have a Bachelor's degree in Computer Science, MIS or related field, 3-5 years experience with business analysis and a minimum of 3 years experience as a systems developer. Experience with Visual Basic, SQL Server, or JavaScript, ASP, and HTML is required.
