

Position Available: Senior Technical Architect
Location: Appleton/Fox Valley

Avastone Technologies, LLC creates custom software solutions for commercial, industrial, education and government customers throughout Wisconsin. Our software development team specializes in database and Internet application development. Due to our expanding business, we are seeking to add to our software development staff.

Avastone Technologies LLC is looking for a Technical Architect to provide leadership and oversee development, deployment, and maintenance of .NET applications. Strong verbal and written communication skills are required to interpret pre-existing system design documented in a variety of methods.

Requirements: To be considered, the candidate must have Expert-Level skills in the following:

- * Microsoft .NET 2.0, C#, ASP.NET, ADO.NET, VB.NET
- * SQL Server 2005, T-SQL
- * XML Web Services, N-Tier Architecture, OO, UML
- * Strong Logical and Debugging skills

Desired Qualifications: AJAX, Web 2.0, localization. Professional certifications such as MCSD, , MCDBA etc. are desirable.

Experience: 5-7 years development + proven track record of deploying n-Tier web applications using the technologies listed above.

This position is based out of our Little Chute location. Interested parties must be prepared to work in the Little Chute office daily. The ability to communicate clearly with our customers face to face and in writing is essential.

Submit cover letter and resume to:
