

Heartland Hosting Services

Hosted Email via MailSite Fusion SP

People first, then business, then emails.

When you are fixated on your email problems, you are not helping your customers or your colleagues. If you have an email server at your location, it's gathering dust and slowly breaking down with every passing moment. When that hardware fails you will be engaged in break-fix issues, warranties, disgruntled employees, and diminished revenue. Why not stop the insanity by relying on Heartland's Data Center services for your email platform?

Greater functionality than your on-site Exchange but without the headaches...

POP or Onsite Exchange Deployment

Heartland Hosted MailSite

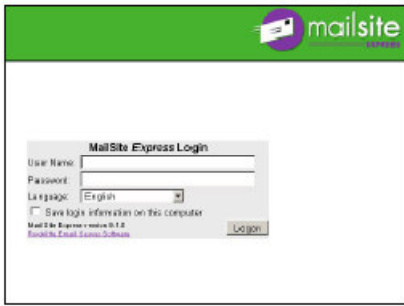

The Heartland Hosted Email Advantage.

With our fully functional off-site POP and Webmail email offering, you no longer need to concern yourself with a local installation of Exchange. Your Outlook 2003/2007 users seamlessly connect to your company's profile in our Data Center. Our fully redundant internet connections and servers offer you multiple exchange roles, PCI Compliant encryption, multiple access methods and peace of mind.

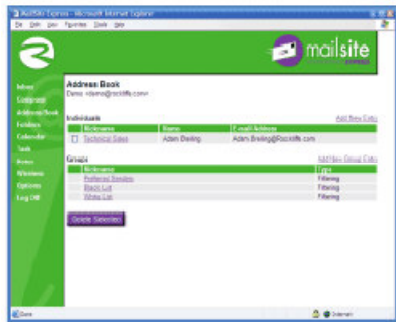

Put your Heart into IT.

One Simple Hosted Email Package.
