

Heartland Hosting Services

Virtual Private Servers

Partly cloudy with a chance of scattered servers.

The term "cloud computing" is a metaphor for using the Internet for business applications. It is based on the cloud drawing depicting the Internet in computer network diagrams. Frequently the map starts with a computer, then a server, then a router, then a firewall, and finally the Internet. In recent history, most of the assets and effort originate from the end user and the server side of the internet. Today, thanks to increased bandwidth and Data Center availability, savvy professionals can leverage *cloud services* in order to avoid hardware dependencies, energy costs, and capital expenses. While shifting applications and resources to an operating expense in the cloud, they are also increasing security, reliability, and efficiency.

The Heartland Virtual Private Server Advantage.

Heartland has continually preserved the best possible relations with customers. Finding new ways to decrease costs and increase capabilities is paramount. When we approach new and existing clientele, the Heartland advantage is clear: an in-house Data Center that is Heartland owned and Heartland operated by Heartland employees. With the virtualization, infrastructure, and application competencies in place, we are properly positioned to meet and exceed your cloud computing expectations.

Put your Heart into IT.

Three Virtual Private Server Packages.

Feature	Professional	Professional Plus	Premium
Disk Space	100 GB	150 GB	200 GB
Dedicated RAM	1 GB	2 GB	4 GB +
2.53GHZ Xeon Intel Processor	1	2	2
Monthly Data Transfer	Up to 2 TB	2 TB	2 TB

Accessible

- Full access and control of your environment, with unlimited access and SSH root accounts.
- Ease of management and administration.
- Guaranteed allocated resources, to just your environment.
- Ease of administration and management with unlimited VPN/RDP/SSH access.

Functional

- Additional features are available to be added to the packages upon request. (can include, but not limited to e-Commerce, X-Cart, PayFlo Pro).
- No risk: full redundancy, guaranteed resources for your environment, and guaranteed network up time.
- Managed backups: weekly full backups included with two week daily incrementals.
- Microsoft SPLA licensing available upon request for SQL, SharePoint, Terminal Server, Windows Server, Exchange, and others.
- Citrix SPLA licensing available upon request
- Dedicated hardware environment on a budget.
- DNS hosting included.

Supported

- 24x7 Help desk.
- Every account is supported by Heartland Technicians.
- Heartland guarantees 99.9% network uptime.
- 300 employees having earned over 600 certifications.
- Heartland has achieved gold partnership status with Microsoft, Cisco, and Symantec.

Secured

- Only YOU can access your resources.
- Dedicated Environment, Isolated from all other accounts – others that use more resources will NOT affect your environment.
- Fully secure: our infrastructure provides full isolation to just your environment.
- VPN is enabled with the separate purchase of a Firewall. (RDP allows for up to 3 users without purchasing Terminal Server licensing).
