Dear Valued Client,

We stand together against COVID-19.

In these turbulent times surrounding COVID-19, many of the states in which Heartland Business Systems (HBS) serves clients have announced “shelter in place” or “safer at home” orders. HBS will continue to operate as an “essential business” classified by individual states and the United States Cybersecurity and Infrastructure Security Agency (CISA).

HBS is a critical part of the essential business supply chain and needs to deliver essential products and services to other essential businesses so they can remain open. Convenience and grocery stores, pharmaceutical and healthcare, agriculture, municipal government, schools, and universities are all relying on HBS to meet their technology demands during this time of crisis. HBS is helping organizations with mobilizing workforces, distance learning, illness tracking, cybersecurity monitoring, “in home” technology services, data center hosting, disaster recovery, and so much more.

HBS considers it our social responsibility to serve our clients and ensure the health and safety of our communities. We are open for business and will continue to operate during normal business hours and beyond for the duration of this world-wide health crisis. If your organization has any needs during this time, please reach out to us at (920) 415-5561 or inquiry@hbs.net.

Thank you for your trust in supporting your organization. We take great pride in serving you and in helping your organization and our nation during this challenging time.

Greg Huza

Vice President of Sales

Heartland Business Systems
