- Build Incident Reporting Tools and Templates
- Incident Readiness Testing

Are you prepared for a breach?

HBS offers a flexible model to help organizations with specific Privacy & Security needs.

Organizations have financial and reputational risk at stake, contact HBS for 360° risk management.

HIPAA RISK ASSESSMENT

HBS offers solutions for every level of maturity and organization size to help mitigate the risks impacting the privacy and security of your organization's protected health information. Your organization will be thoroughly assessed using these key tools:

- Executive Summary for any level of maturity and organization size
- Prioritized risk matrix based on likelihood and impact
- Remediation recommendations based on complexity, size, culture and budget
- External Vulnerability Scan

VULNERABILITY AND THREAT MANAGEMENT

Are you prepared for a leak? Our assessments focus on identifying specific threats and vulnerabilities targeting or impacting your business. Our most common assessments include:

- Threat Assessment
- Social Engineering Assessment
- Penetration Testing
- Risk and Controls Assessment

- Data Leakage Assessment
- Configuration Reviews

DATA PROTECTION & MANAGEMENT

Data is both the lifeblood of your organization as well as one of its highest risks. We will ensure that this major asset is worth it for your organization. All aspects will be accounted for:

- Data Discovery Tools – beyond HIPAA
- Data Loss Prevention
- Records Retention
- Information Insights

INCIDENT MANAGEMENT

Proper security incident planning requires proactive and reactive processes, policies, standards, tools and procedures that are tested and validated before an incident actually happens. Using these key preparations, our trained experts will accelerate your organization's ability to respond quickly, effectively, and efficiently to a security-related incident:

- Prevent common related incidents
- Assess your ability to quickly detect and respond
- Build incident reporting tools and templates
- Perform incident readiness testing
